Summary

Junior Full-Stack Software Engineer with 7 months of experience in Next.js and Node.js for full-stack development, along with solid expertise in PostgreSQL and Express.js for backend design. Additionally skilled in React.js, MongoDB, and REST API development. Passionate about building scalable, maintainable web applications. Always eager to learn and take on new challenges to drive innovation and efficiency.

Technical Skills

JavaScript (ES6+)	React.js, Next.js	AWS EC2, Docker
TypeScript	Node.js, Express.js	CI/CD & Deployment
HTML5, CSS3	REST API, WebSockets	Vercel AI SDK
PostgreSQL, MongoDB	Prisma ORM	Communication, Problem Solving

Experience

Full-Stack Engineer — Techloset Solution, Onsite Nov 2025 – Mar 2026

- Conducted requirements gathering and analysis by actively engaging with the project manager to understand feature needs and translate them into technical solutions.
- Contributed to the development and implementation of 4 full-stack projects across Next.js 16, MERN, and React Native, each approved by senior engineers against production architecture standards.
- Owned each project end-to-end: database schema design, REST API development, Redux Toolkit state management, and Docker containerization.

Junior MERN Stack Developer — MIT Programmer, Onsite Jun 2025 – Sep 2025

- Collaborated in a professional team to build client-facing full-stack applications, contributing across the stack from data modeling and REST API development to frontend UI implementation.
- Built a CRM system featuring role-based access control (Admin / Manager / Agent), dynamic data tables, and an analytics dashboard with live data visualizations.

Projects

UniSync | *Next.js 16, TypeScript, PostgreSQL, Prisma, Redis, Stripe, SSE* Live | GitHub

- Multi-tenant university platform with 5 role-based dashboards (Super Admin, Admin, VC, HOD, Student) — handling student registration, enrollment, fee lifecycle, and live institutional health metrics.
- Automated the full fee cycle: Stripe payment processing, digital receipt generation, scheduled email reminders, and real-time payment feeds via Redis pub/sub and SSE streaming.

MyComps.ai — Real Estate AI Agent | *React, Express.js, OpenAI API (GPT-4), MongoDB, Stripe* Live

- GPT-4 powered tool that pulls property data from Zillow, runs comparable analysis, and estimates ARV — generating investor-ready PDF reports automatically.
- Built with multi-tenant JWT auth, Stripe/Whop billing integration, and deployed on Railway — live with real users from day one.

MedicareDashboard | *React, TypeScript, Node.js, Express, Prisma ORM, MongoDB, Redux Toolkit* Live | GitHub

- Healthcare management platform with appointment scheduling (FullCalendar), an analytics dashboard (Recharts), and JWT access/refresh token rotation with OTP email verification.

EngageFlow Sync — AI Sales CRM | *React 18, TypeScript, Supabase, PostgreSQL, Groq AI* Live | GitHub

- Sales CRM powered by Groq Llama-4 via Vercel AI SDK for AI-assisted lead scoring with real-time streaming responses; integrated Google Calendar for meeting creation and Resend for transactional email delivery.

Education

GCU Faisalabad Dec 2022 – Present
BS Computer Science CGPA: 3.66 / 4.0
